

Royal National Institute for Deaf People Pension and Life Assurance Scheme

September 2020

Statement of Investment Principles

Introduction

This document constitutes the Statement of Investment Principles ('the SIP') required under Section 35 of the Pensions Act 1995 (as amended) for the Royal National Institute for Deaf People Pension and Life Assurance Scheme ('the Scheme'). It describes the investment policy being pursued by the Trustees of the Scheme and is in compliance with the Government's voluntary code of conduct for Institutional Investment in the UK ('the Myners Principles') and TPR's Investment Guidance for defined benefit pension schemes. This SIP also reflects the requirements of Occupational Pension Schemes (Investment and Disclosure) (Amendment and Modification) Regulations 2018.

The Scheme Actuary is Rebecca McGowan of Aon, the Investment Adviser is River and Mercantile Solutions (collectively termed 'the Advisers').

The Trustees confirm that, before preparing this SIP, they have consulted with Action on Hearing Loss ('the Sponsoring Employer') and the Scheme Actuary and have obtained and considered written advice from the Investment Adviser.

The Trustees are responsible for the investment of the Scheme's assets and where they are required to make an investment decision, the Trustees always receive advice from the relevant Advisers first. They believe that this ensures that they are appropriately familiar with the issues concerned.

In accordance with the Financial Services & Markets Act 2000 ('FSMA'), the Trustees set general investment policy, but have delegated day-to-day investment of the Scheme's assets to be undertaken through the fiduciary management service of River and Mercantile Investments Limited ('R&M Solutions'), hereafter referred to as the 'Investment Manager'.

Scheme Governance

The Trustees are responsible for the governance and investment of the Scheme's assets. The Trustees consider that the governance structure is appropriate for the Scheme as it allows the Trustees to make the important decisions on investment policy, while delegating the day-to-day aspects to the Investment Manager or the Advisers as appropriate.

The Trustees will review this SIP at least every three years, or following any changes to the investment strategy, and modify it with consultation from the Advisers and the Sponsoring Employer if deemed appropriate. There will be no obligation to change this SIP, the Investment Manager or Adviser as part of such a review.

Suitability

The Trustees have defined the investment objective and investment strategy with due regard to the Scheme's liabilities.

The Trustees have taken advice from the Advisers to ensure that the proposed strategy, and the assets held by the Scheme through that strategy, are suitable given its liability profile, the Trustees' objectives, legislative requirements, regulatory guidance and specifications in the trust deed and rules governing the Scheme (the Trust Deed).

Statutory Funding Requirement

The Trustees will obtain and consider proper advice on the question of whether the investments and investment strategy are satisfactory having regard to both the investment objectives and the requirement to meet any statutory funding requirements. The funding position is reviewed periodically by the Scheme Actuary, with a full actuarial valuation at least every three years.

The Trustees will consider with the Investment Adviser and the Scheme Actuary whether the results of these actuarial valuations suggest that any change to investment strategy is necessary to ensure continued compliance with the statutory funding requirement.

Investment Objectives

The overall objective of the Scheme is to meet the benefit payments promised as they fall due. The Trustees have set the following qualitative objectives:

1. The acquisition of suitable assets, having due regard to the risks set out in this Statement, which will generate income and capital growth to pay, together with contributions from members and the Sponsoring Employer, the benefits which the Scheme provides as they fall due.
2. To limit the risk of the assets being assessed as failing to meet the liabilities over the long term having regard to any statutory funding requirement.
3. To achieve a return on investments which is expected to at least meet the Scheme Actuary's assumptions over the long term.

In quantitative terms, the Trustees' long-term objective for the Scheme is to target an investment return objective of approximately 3.0% per annum (net of fees) in excess of the Liability Benchmark Portfolio ("LBP") for the Growth Assets and approximately 0.0% per annum (net of fees) in excess of the LBP for the Matching Fund. For the avoidance of the doubt the Growth assets consist of a blend of both a diversified portfolio of assets such as (but not limited to) equity, high yield and property and equity derivatives strategies known as Structured Equity which is intended to provide additional downside protection. The Trustees decide the blend of these funds to target the appropriate return for the Scheme, this is shown in the Quarterly Monitoring Report.

FlightPath

The Scheme has a FlightPath created to reach an endgame position of full funding in 2034 on a Gilts + 0.25% basis. River and Mercantile monitor the required return on a regular basis and advise the Trustees if an update to the Growth Assets/Matching Fund split is required.

In order to assess if there is an opportunity to de-risk, the required return is compared to the schemes target returns:

- Target Return: LBP + 3% p.a. on the Growth Assets
- Outperformance Target: LBP + 4% p.a. on the Growth Assets

The following scenarios have been discussed as part of the review process:

1. If the Minimum Required Return is greater than the Outperformance Target (& hence also the Target Return) then this is for the Trustees and Sponsor to note.

2. If the Minimum Required Return is less than the Outperformance Target but higher than the Target Return then this is a flag for discussion over reducing the Growth Assets allocation.

3.

If the Minimum Required return is less than the Target Return then this is an opportunity for the scheme to de-risk while remaining on track for self-sufficiency by 2034. Trustees will consult with the Employer (as agreed at the 2018 valuation) before deciding whether de-risking is appropriate.

For the avoidance of doubt, the Trustees also consider a wide range of other factors such as risk appetite and market conditions in making a decision around whether to de-risk.

Implementation of investment strategy

The Trustees have delegated the investment of the Scheme assets to the Investment Manager, which has discretion to invest the Scheme assets in underlying securities and funds, either directly or through the use of other investment managers (hereafter referred to as the 'Underlying Managers') to run the portfolio on a day-to-day basis. The Trustees have acknowledged and considered with sufficient diligence the potential conflict that may arise from the Investment Manager and the Investment Adviser being the same organisation.

Monitoring

The Trustees will monitor the performance of the Investment Manager against the agreed performance objectives.

The Trustees, or any other suitably qualified Adviser on behalf of the Trustees, will regularly review the activities of the Investment Manager to satisfy themselves that the Investment Manager continues to carry out their work competently and have the appropriate knowledge and experience to manage the assets of the Scheme.

As part of this review, the Trustees will consider whether or not the Investment Manager:

- Is carrying out their function competently.
- Has regard to the need for diversification of investments.
- Has regard to the suitability of each investment and each category of investment.
- Has been exercising their powers of investment with a view to giving effect to the principles contained in this SIP, so far as is reasonably practical.

The Trustees will also assess the Investment Manager by conducting an external benchmarking performance review no less than every 3 years.

If the Trustees are not satisfied with the Investment Manager they will ask the Investment Manager to take steps to rectify the situation. If the Investment Manager still does not meet the Trustees' requirements, the Trustees will remove the Investment Manager and appoint another.

Corporate Governance and Stewardship

The Trustees and Investment Manager have agreed, and will maintain, formal agreements setting out the scope of the Investment Manager's activities, charging basis and other relevant matters. The Investment Manager has been provided with a copy of this SIP and is required to exercise its powers with a view to giving effect to the principles contained herein and in accordance with subsection (2) of Section 36 of the Pensions Act 1995.

The Trustees have appointed the Investment Manager to implement the Scheme's investment strategy. The Investment Manager manages assets directly on behalf of the Trustees as well as having delegated authority to appoint, monitor and change the Underlying Managers. The Trustees are comfortable that through this process of delegation, the Underlying Managers are aligned with the policies agreed with the Investment Manager.

The Investment Manager is appointed to carry out its role on an ongoing basis. The Trustees periodically review the overall value-for-money of using R&M Solutions, and information in relation to costs associated with investing is included in the quarterly monitoring report. The Trustees are satisfied that these arrangements incentivise the Investment Manager:

- to align its investment strategy and decisions with the Trustees' investment policies, such as their return target and the restrictions detailed in the Investment Management Agreement, and
- to assess and make decisions based on the medium-to long-term financial and non-financial performance of issuers of debt or equity, and to engage with such issuers to improve this medium- to long-term performance. The success of such engagement will contribute to the Scheme's performance, which is measured relative to the Trustees' long-term performance objectives.

The Scheme's investments are generally made via pooled investment funds, in which the Scheme's investments are pooled with those of other investors. As such, direct control of the process of engaging with the companies that issue these securities, whether for corporate governance purposes (such as capital structure) or other financially material considerations, is delegated to the Underlying Managers.

The Trustees have delegated responsibility for monitoring and voting on decisions relating to their Underlying Manager holdings to the Investment Manager. The Investment Manager has in place a voting policy which sets out how it will aim to vote at a general meeting of a pooled fund. For any special resolutions or extraordinary general meetings, the proposed votes of the Investment Manager are subject to additional sign-off by the appropriate representative from the Investment Manager.

The Investment Manager undertakes regular reviews of all Underlying Managers. These reviews incorporate benchmarking of performance and fees, with some managers on performance-related fees as well as performance reviews (including understanding key drivers of performance), investment due diligence meetings and operational due diligence reviews. The Investment Manager reviews the governance structures of Underlying Managers, as well as assessing whether their fees, expenses (and any other charges) are in line with industry peers at inception and from time to time whilst invested.

Where it can be determined, the Investment Manager assesses whether Underlying Manager remuneration arrangements are aligned with the Trustees' objectives. The method and time horizon for evaluating and remunerating Underlying Managers is determined by criteria set by the Investment Manager, as detailed above.

The Trustees acknowledge the inherent potential for conflicts of interest which exist as part of ongoing Investment management business activities. As an FCA regulated firm, the Investment Manager is required to prevent or manage conflicts of interest. Where Underlying Managers are also regulated, they are likely to be subject to such requirements to manage conflicts of interest as are applicable in their jurisdiction of incorporation or operations. The Investment Manager directly monitors these as part of their regulatory filings (where available), the Investment Manager also monitors this as part of ongoing review. The Investment Manager's Conflict of Interest policy is available publicly here: https://riverandmercantile.com/Asp/uploadedFiles/file/Corporate_Governance/RMG_Conflicts_of_Interest_Policy.pdf

The Investment Manager oversees the turnover costs incurred by Underlying Managers as part of its ongoing monitoring process and evaluates such costs to determine if they are in line with peer groups and the Investment Manager's expectations. Where there are material deviations the Investment Manager engages with Underlying Managers to understand the rationale for such deviations and take appropriate action.

Realisation of Investments

The majority of assets are held in underlying pooled funds, most of which can be realised easily if the Trustees so require. The Investment Manager is permitted to hold up to 20% of on-risk assets into illiquid investments (as defined in the Investment Management Agreement), which the Trustees acknowledge can take additional time to realise. The Trustees have considered this risk against the possibility of needing to realise these assets and are comfortable it is a reasonable approach to take.

Derivatives

The Trustees may enter into contracts with counterparties, including investment banks, in order to execute derivative transactions. The Trustees have taken advice on the suitability of the contracts and have delegated responsibility to the Investment Manager to implement these instruments on its behalf. Derivative instruments are typically used for risk management purposes in the portfolio.

Financially material investment considerations

These considerations which include the below "Risks" can affect the long term financial performance of investments and can (but do not have to) include environmental, social and governance factors (otherwise known as "ESG") where relevant.

The trustees currently employ a fiduciary Investment Manager to manage investments on their behalf including the appointment of individual Underlying Managers. As a result, the Trustees' policy is to delegate consideration of financially material factors to the Investment Manager who considers these when constructing the portfolio, including looking at Underlying Managers. All references to ESG relate to financial factors only. All references to ESG also include climate change. As part of this approach the Trustees review some key metrics on (usually) a quarterly basis that are provided by the Investment Manager covering environmental, social and governance which enable them to question the Investment Manager. If the Trustees are not comfortable with the metrics presented, they will ask the Investment Manager to provide an update on the reasons behind these scores. Through a process of review and engagement the Trustees hope to improve the overall ESG rating of the portfolio over time, and believe that over the long term the Portfolio will be more resilient to factors such as ESG risks.

When assessing the performance of the Investment Manager or making decisions regarding the appropriate model and / or appointee for managing the scheme's investments the Trustees will ensure that ESG considerations are part of the process.

ESG factors and stewardship are considered on behalf of the Trustees, in the context of long-term performance, by the Investment Manager as part of the Underlying Manager selection criteria. This review occurs before they are approved for investment in the portfolio. Once an Underlying Manager is appointed, the Investment Manager monitors the ESG implementation and ongoing compliance with other factors, such as stewardship, as a part of overall engagement on behalf of the Trustees. The Trustees will from time to time review the Investment Manager's process for engagement with individual Underlying Managers and will engage with the Investment Manager based on the quarterly portfolio monitoring as required.

Risks

The Trustees recognise a number of risks involved in the investment of the assets of the Scheme. These risks, and how they are measured and managed, include:

- **Funding and asset/liability mismatch risk** – the risk that the funding level is adversely affected due to a mismatch between the assets and liabilities. This risk is managed in the following ways:
 - A liability benchmark portfolio or 'LBP' is used as a proxy for the liabilities in order to measure the approximate changes in the liabilities (due to changes to the relevant gilt yields only). The Trustees monitor this change relative to the change in asset values on a quarterly basis. The LBP is reviewed following each actuarial review, or when significant market or Scheme events (e.g. a significant change in inflation expectations) imply that an amendment may be appropriate.
 - The Trustees also recognise the risk of a negative impact on the funding level due to changes in the actuarial assumptions used to calculate the liabilities and variation in experience. This is managed by aiming for a higher overall investment return than implied by the liability discount rate.
 - When setting and reviewing investment strategy, the Trustees examine how the investment strategy impacts on downside risk. Downside risk of the investment strategy is also measured by reference to the LBP and can therefore also be assessed as part of the quarterly review process.
 - This risk is also monitored through regular actuarial and investment reviews including monthly portfolio updates.
- **Underperformance risk** – the risk of underperforming the benchmarks and objectives set by the Trustees. This risk is minimised using the following techniques:
 - Appropriate diversification across asset classes, within sectors and between individual stocks to minimise the effect of a particular stock or sector performing badly.
 - The use of instruments and strategies designed to control the extent of downside exposure.
 - The selective use of active management when appropriate given market conditions, the asset class considered and where the benefits (risk and/or return) are expected to outweigh the additional costs/fees.
 - Regular monitoring of the managers' performance, processes and capabilities with respect to their mandate and by the diversification across multiple Underlying Managers by the Investment Manager.
- **Cash flow risk** – addressed through the monitoring of the cash flow requirement of the Scheme to control the timing of any investment/disinvestment of assets.
- **Concentration risk** – the risk of an adverse influence on investment values from the concentration of holdings is reduced by the diversification of the assets.
- **Counterparty risk** – the risk of a counterparty to an agreement not carrying out his side of the deal. Where derivatives are used, the risk of counterparty default is reduced through the requirement in the relevant documentation that regular collateral or margin payments be made. It is also considered in the selection of counterparties and the incorporation of protection mechanisms in the documentation in the event of a downgrade in credit quality of an existing counterparty.

- **Country risk** – the risk of an adverse influence on investment values from political intervention is reduced by diversification of the assets across many countries.
- **Currency risk** – the risk that fluctuations in the value of overseas currencies affect the total return of the Scheme's investments when compared to a Sterling benchmark. The Trustees mitigate this risk by electing to allow the Investment Manager to use currency hedging.
- **Default risk** – the risk of income from assets not being paid when promised. This is addressed through restrictions for the Investment Manager and Underlying Managers, e.g. a minimum credit rating of the bonds they are allowed to buy and also a high proportion of the bonds held are government bonds which have little default risk.
- **ESG risk** – the risk of adverse performance due to ESG related factors including climate change. This is addressed by the Investment Manager's ESG assessment at the point of investment with Underlying Managers. A summary of the overall ESG characteristics in the portfolio in the quarterly governance report.
- **Mismanagement risk** – the risk of unsuitable investment activity by the Investment Manager. This is addressed in the agreement with the Investment Manager, and in turn by the Investment Manager with the Underlying Managers, which contain restrictions on the proportion and type of asset classes that the Investment Manager or Underlying Managers may invest in.
- **Organisational risk** – the risk of inadequate internal processes leading to problems for the Scheme. This is addressed through regular monitoring of the Investment Manager and Advisers by the Trustees, and of the Underlying Managers by the Investment Manager.
- **Sponsor risk** – the risk of the Sponsoring Employer ceasing to exist which, for reasons of prudence, has been taken into account when setting the asset allocation strategy. The Trustees regularly review the covenant of the Sponsoring Employer.

The Trustees will keep these risks and how they are measured and managed under regular review.

Non-financial matters

Although the Trustees acknowledge that members may hold views around non-financially material factors (such as ethical considerations, social and environmental impact matters or future quality of life considerations for members and beneficiaries), these are not taken into account when making investment decisions. The member base is relatively diverse and it is considered it would be difficult to source a common view across the membership. Although at this time the Trustees have no plans to seek the views of the membership on ethical considerations the Trustees would be open to consider members opinions on the areas mentioned above if members have a strong view. As the stewards of the assets on the members behalf if there was sufficient demand from the membership then the Trustees would be open to considering changing this policy.
